NEW AND IMPROVED CLOSET PANS.

STEPHEN GREEN AND CO.

IMPERIAL POTTERIES, LAMBETH.

These Pans will be found to combine all the latest improvements, with the advantage of having a larger water surface than any other kind of trapped Pan, by which arrangement the sides are kept perfectly clean. The trap is not larger than usual, and has its smallest diameter at the bottom of the Pan, therefore in the event of any thing passing through it cannot possibly stop or clog the drain.

Manufactured in superior double-glazed Stoneware, white and smooth inside, at the SAME PRICE AS THE COMMON PAN.

If with Patent Valve, 1s. 6d. extra.

TO ARCHITECTS.

50 PER CENT. is SAVED in PLUMBERS' WORK by the use of JENNINGS'S INDIA-RUBBER TUBE WATER CLOSETS.

They require no service-box valves, air-pipe, trap lever, cramps, or screws. Having no copper pan or brass valve chambers, they disengage no impure air; in action they are noiseless. Waterness of the highest order can be furnished to large public works, and testimonials from many private individuals can be seen on application to the Patentee.

JENNINGS'S LAVATORIES for ASYLUMS and HOSPITALS have been much approved, the cocks all being self-closing except to left running.

GEORGE JENNINGS has had some large basins made to his patent and adapted for his self-closing Cocks, Inlet, Outlet, and Waste, to Messrs. Wedgwood and Co. They are well suited for the drainage-improvers of the nobility, but being inexpensive they remain within the reach of all classes. They may be seen in use at the Bakery. These self-closing supply Cocks have been well tested; they are in use at the West Derby Asylum, New Wiltshire Asylum at Leigh's Hospital, Guy's Hospital, at the establishment of Messrs. Holbrook and Rogers, St. Paul's Churchyard, &c. &c. and in many public schools.

JENNINGS'S INDIA-RUBBER TUBE BALL and other COCKS, for ALL purposes, as now manufactured, will be found by Architects most simple and durable.

For descriptive drawings, references, &c. apply to GEORGE JENNINGS, General Brass Founder, 29, Great Charlotte-street, Blackfriars-road.

STOCK & SON'S SOIL-PAN SERVICE-BOX.

The object of this contrivance is to institute the introduction of sanitary improvements into the dwellings of the working classes by the adoption of such an arrangement of closet, soil-pan, apparatus as will enable the "constant supply system" of water service to be made available for the removal of the refuse by preventing the enormous waste of water in places of this description, to which water companies now so strongly and so properly object. By the use of this service-box an ample supply of water is obtained, without the possibility of its being wasted by propping the valve, weighting the handle, or by other means. It is so constructed that, as long as the discharge-valve remains open, a further supply cannot enter the service-box from the main.—Drawings and descriptions may be obtained from STOCK and SON, Manufacturers of Plumbers' Brass-work, Sanitary Closets, Rotary Screw-down Taps, Fire Plugs, Gas Fittings, and Church Furniture in iron and brass, Temple-street, Birmingham.
